

Pinetrim Clear Pine

Architraves, Cornices, Scotia,
Quad and Profiled Trims
are perfectly suited to add
the finishing touch to every
room in your home.

Defect-free Clear Pine — Premium clear softwood which is easy to cut, nail and glue.

Solid Timber — Suitable to clear finish, stain or paint to match any colour scheme.

Versatile — Add depth and definition to your project while covering corners and joins, or create your own profile by combining different profiles.

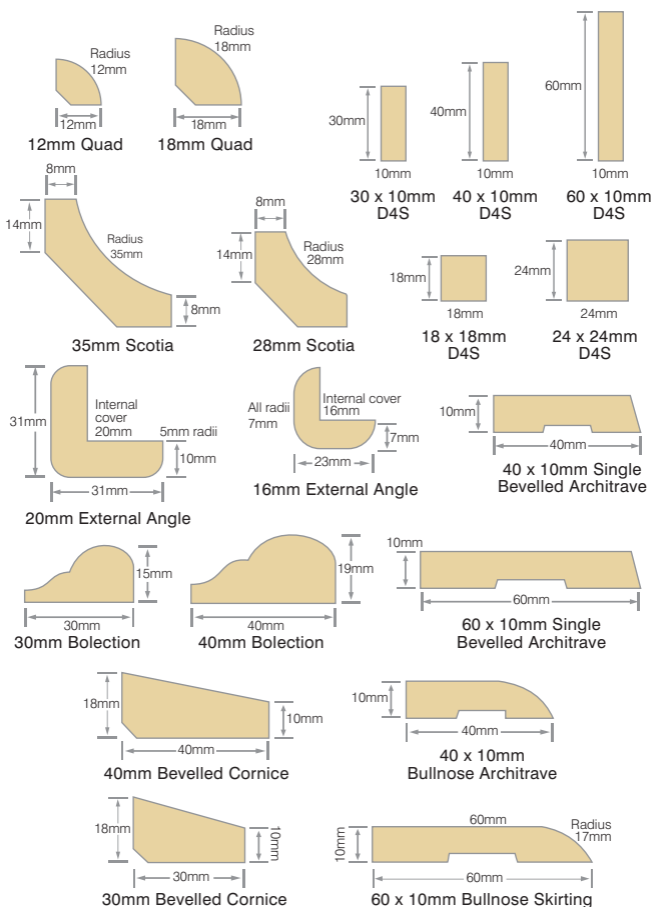

Sustainable
— FSC® Certified to support sustainable management of the planet's resources.

Pinetrim CLEAR PINE MOULDINGS ARE THE PERFECT CHOICE TO DECORATE EVERY ROOM IN YOUR HOME

Add definition, depth and drama to your room while covering any gaps between the floor and walls, window frames and doors — and tidy up internal corners or joins in sheet panels. You have the option of choosing from square, rounded or decorative shapes in a variety of sizes, or combine profiles to create your own look. Easy to install and finish with paint, stain or clear finish. Pinetrim Clear Pine Mouldings can help you transform any room.

Handy Tips

- Prior to installing, acclimatise the mouldings in the room where they are to be fixed for 24 to 48 hours. This will minimise further movement when installed.
- Start by cutting your moulding pieces a little longer than required — you can always trim some off.
- Pre-drill holes for nails to avoid splitting.
- Paint or stain mouldings prior to installing.
