

# Tanalised<sup>®</sup> Azure

## Limited Structural Guarantee

### H3.1 / H3 Treated Hume Pine Mouldings and Boards

Tanalised<sup>®</sup> Azure wood protection system manufactured by Arch Wood Protection (NZ) Limited incorporates an Environmental Risk Management Authority of New Zealand and Australian Pesticides & Veterinary Medicines Authority registered wood preservative. The triazole type preservatives such as Tanalised<sup>®</sup> Azure are recognised in relevant standards such as NZS3640 and AS1604 series (preservative code number 64). This wood preservative system is used by leading manufacturers of appearance, finger jointed, structural and engineered wood products in New Zealand, Australia and elsewhere to provide long term protection against rot and insect attack.

Arch Wood Protection guarantee wood building components manufactured by Hume Pine (N.Z.) Limited and treated with Tanalised<sup>®</sup> Azure preservative in compliance with New Zealand and Australian Standards to be resistant against fungal decay (rot) and insect attack from the date of purchase for the periods as set out in this form (overleaf). Any correctly treated and installed Tanalised<sup>®</sup> Azure treated wood building components that become functionally unserviceable due to fungal decay or insect attack within the specified guarantee period will be replaced subject to the terms detailed in this form.

This limited guarantee is underwritten by Arch Wood Protection (NZ) Limited (a fully owned subsidiary of Arch Chemicals Inc of the U.S.A.) and is provided free of charge to purchasers or owners of Tanalised<sup>®</sup> Azure treated wood mouldings and building components from Hume Pine. The terms of the limited guarantee will be adhered to by Arch providing that the wood products are correctly treated and installed as detailed in this document (see terms and conditions overleaf).

**This limited guarantee is independent of any other warranties and legal rights which you, as the purchaser or owner, may have with Arch Wood Protection (NZ) Limited, Hume Pine or your tradesman / builder. This limited guarantee does not limit or modify any other rights that you have under law. You should also retain copies of your purchase documentation such invoices or receipts for the product supplied for confirmation against this guarantee. This form also includes a section to document your guarantee for your records. See the guarantee form overleaf for terms & conditions and further details**

Limited Structural Guarantee

# Terms & Conditions

## Tanalised® Azure Limited Structural Guarantee

The following table identifies the specific guarantee periods and situations that are warranted under this program. Subject to the Consumer Guarantee Act (NZ) or equivalent legislation in other countries as applicable, Arch Wood Protection's maximum liability under this guarantee program is strictly limited as per the following table.

Treatment Level <sup>(1)</sup>	Specific Product Examples <sup>(2)</sup>	Conforming Preservative Number <sup>(3)</sup>	Guarantee Period <sup>(4)</sup> (product replacement)
<b>H3.1</b> (New Zealand) <b>H3</b> (Australia)	Wood mouldings and building components manufactured by Hume Pine. Weatherboards, door jambs and other external finishing & joinery timbers <sup>(5)</sup>	64	25 years

**Notes:**

- (1) Treatment levels are defined in NZS3640 and AS1604.1 and are a guide to the general severity of biological hazard (decay fungi and termites) that are expected in a range of timber application situations. See AS1604.1 Section 1 and NZS3640 for further details.
- (2) The examples provided here are not exhaustive. Consult NZS3640, NZS3602 and AS1604.1 Appendix D, your planning and building authority or your supplier if you are unsure of the correct treatment specification for a particular application.
- (3) The preservative number can be found on the treatment brand that should appear on each piece of treated timber and will have the following form – **038 64 H3.1** or **038 64 H3**. The index **038** uniquely identifies the facility where the Hume Pine components are treated with Tanalised® Azure preservative. See NZS3640 or AS1604 for full specifications of treatment.
- (4) The guarantee period is from the time of purchase as shown on the sales receipt.
- (5) Consult NZS3602 and NZS3604 for guidance where H3.1 can be used in these cases.

Except where the Consumer Guarantee Act (NZ) or equivalent legislation in the destination country requires otherwise, the liability of Arch Wood Protection for any claim under this limited guarantee;

- Is limited to replacement of equivalent treated timber products.
- Does not include freight, labour costs, finishing or painting, consequential losses or damage, incidental or ancillary costs arising directly or indirectly from the product or use of the product however caused.
- Excludes deterioration of or damage to Tanalised® Azure treated wood components due or any other cause apart from insect attack or fungal decay.
- Excludes any minor or aesthetic deterioration that does not significantly affect the functional capacity of the products such as paint peeling, surface mould or discoloration.
- Excludes deterioration or faults due to inherent physical properties of the wood such as shrinking, swelling, warping, twisting or resin bleed.
- Excludes any Tanalised® Azure treated wood products used at a higher user category level than as specified (H3.2 or higher in New Zealand, H4 or higher in Australia).
- Excludes any Tanalised® Azure treated wood products not installed in compliance with Hume Pine product use instructions or in contravention of local building approvals and appropriate building standards (see overleaf).

## ADDITIONAL INFORMATION AND REQUIREMENTS:

- Only treated wood building components from Hume Pine incorporating Tanalised® Azure preservative from Arch Wood Protection (NZ) Limited are covered under this limited guarantee.
- Tanalised® Azure treated wood products must not be re-sawn, or re-sized after treatment (except for minimal cutting to length or notching and rebating as required for fitting and joining according to Hume Pine's product instruction).
- All end cuts, rebates, notches et cetera must be resealed with a suitable "in-can" wood preservative such as Tanalised® Enseal.
- It is strongly recommended that all Tanalised® Azure treated wood products in weather exposed applications are coated with premium quality exterior paint or timber stain to maintain optimum appearance. Many Tanalised® Azure treated wood products such as fascia and cladding are supplied with a factory applied primer coat. Consult your supplier for details.
- The Tanalised® Azure treatment is not corrosive to nails and fixings, however corrosion resistant nails and fasteners should be used in all exterior or weather exposed applications. Corrosion or failure of fasteners is not covered under this guarantee.
- To avoid excess swelling or surface discolouration of Hume Pine wood building components, ensure that rain exposure is minimised before and during construction. This can be achieved by pre-construction storage of components under cover, providing temporary protection such as tarpaulins or rain sheets during construction and minimising build time. Consult the Hume Pine product manuals for further details.
- Construction of some outdoor structures such as garden sheds, decks, car ports and home extensions may require approval from your local planning authority. If in doubt check with your local city or state planning office for requirements. This limited guarantee may be void in whole or part for Tanalised® Azure treated wood products used in any structure built without or in contravention of appropriate planning approvals.
- Use good installation and building practices in accordance with Hume Pine product recommendations, relevant standards and building codes.

Arch and our partner suppliers reserve the right of site inspection and verification of any claims made under this guarantee. Arch shall be entitled to reject any claim in whole or in part if any of these terms and conditions are not met in whole or in part.

## WORKING SAFELY WITH TANALISED® AZURE TREATED WOOD PRODUCTS:

Tanalised® Azure treated wood products are safe to use with appropriate precautions. Handling any wood product including treated wood may present certain hazards. Therefore the following precautions should be taken when handling or disposing of the material.

- Avoid inhalation of sawdust. Use a dust mask or air extraction if airborne dust is being generated.
- Keep the work area clean and do not allow wood dust to accumulate

- Brush sawdust off skin and clothes.
- When using power saws or machining, wear goggles to protect the eyes from flying particles
- Wash hands after working with treated timber and before eating, drinking and smoking.
- Dispose of treated timber off-cuts, waste pieces and shavings by ordinary waste collection.
- Do not burn treated wood or waste.

For any claims or further information, please contact - Arch Wood Protection (NZ) Limited, PO Box 22-148, Otahuhu, Auckland, New Zealand

Issue date: October 2010

Arch reserve the right to vary future versions of this guarantee including terms and conditions without notice.
